To the Moon and back

The Moon is the only celestial body other than Earth on which humans have set foot.

While the Soviet Union's Luna programme was the first to reach the Moon with unmanned spacecraft in 1959, the United States' NASA Apollo program achieved the only manned missions to date, beginning with the first manned lunar orbiting mission by Apollo 8 in 1968, and six manned lunar landings between 1969 and 1972, with the first being Apollo 11.

Pop music is a genre of “popular” music which originated in its modern form in the

Campaign against the Latgallians and Selonians in 1208–1224

After subjugation of Livonians the crusaders turned their attention to the Latgallian principalities to the east along the Gauja and Daugava rivers. The military alliance in 1208 and later conversion from the Greek Orthodoxy to Roman Catholic faith of the Principality of Talava was the only peaceful subjugation of the Baltic tribes during the Nordic crusades. The ruler of Talava Talivaldis (Talibaldus de Tolowa) became the most loyal ally of German crusaders against the Estonians, and he died as a martyr and a Catholic in 1215. The war against the Latgallian and Selonian countries along the Daugava waterway started in 1208 by occupation of *the Orthodox Principality of Koknese and the Selonian hillfort of Selpils*.

The campaign continued in 1209 by attack on the Orthodox Principality of Jersika (known as Lettia), accused by crusaders to be the ally of Lithuanian pagans.

Only in 1224, with the division of Talava and Adzele counties between the Bishop of Riga and *the Order of the Swordbearers*, Latgallian countries finally became the possession of German conquerors. The territory of the former Principality of Jersika was divided by the Bishop of Riga and the Livonian Order in 1239.

Eventually, the northern Estonia was in Danish hands. Later Denmark emerged as a unified kingdom.
